

CASE STUDY: ADVANCED GLIDE SLOPE INDICATOR

Aeronautical & General Instruments Limited (AGI) is an established British company, which manufactures a wide range of instruments and systems for the defence and civil markets worldwide.

Optiguard AR™ was chosen due to its outstanding Anti-reflection properties, salt water resistance & its impeccable abrasion resistance.

Development started when AGI were looking for a solution for the ASGSI units, they wanted to remove unwanted internal reflections, to help guide approaching pilots to the vessel.
